

August 30, 2011

Can please post the following to your site? I will add more platform information in the coming days.

Some candidates said in the debate that donating my salary back to the ward is a gimmick.

That is not the case. This is something that is embedded in my genes and so I feel compelled to do it. My grandfather, helped many poor families in his village and helped many poor children get an education. My father, an engineer by profession contributed to the society by actively participating in South Asian Social Services Organisation (SASSO) during the eighties. He also worked with the united way.
